Executive Summary

At the time of writing of this third iteration, *Call Monitoring Report 3*, of the Reports on the StandICT.eu 2023 Open Calls, the project is in full stride having successfully launched a total six Open Calls, of which the first four Open Calls have led to the funding of 141 projects for a total of approximately 1.2 MEURO of the 3 MEURO earmarked for Financial Support to Third Parties, the 5th Open Call under evaluation with results to be finalised at the beginning of February, and the 6th Open Call closing on the 14th of the same month.

The issue of this Report coincides exactly with the Interim milestone of the Project, and therefore also provides an opportunity, with the project in full swing, to take stock of the consolidated Modus Operandi surrounding the StandICT.eu 2023 Open Calls. Building on the successes underpinning the pre-cursor StandICT.eu Project and further experience gained and improvements made over this first period of the project, the Consortium believes a virtuous, perpetuating cycle has been set in motion around the Open Calls. This runs from definition of the topics of the Open Calls, to their promotion through a widening outreach, to an improved evaluation process, and perhaps most significant of all, a timely, constant monitoring and tracking of the funded projects.

This latter step ensures that the true potential of the outputs of the funded projects is harnessed, ensuring that they feed into the StandICT.eu European Observatory for ICT Standardisation – EUOS, that they are showcased in terms of impact created through the series of dedicated reports, Following the Fellows, being published for each Open Call in addition to the formal project deliverables, and are tracked both in terms of where each project fits into the technological or application domains of the Multi-Stakeholder Platform Rolling Plan for ICT Standardisation¹, currently under implementation in response to a recommendation made at the latest European Multi-Stakeholder Platform on ICT Standardisation meeting and further in terms of the creation or revision of new Standards, Working Groups, Technical Committees or Focus Groups.

¹ [Rolling Plan ICT Standardisation 2021](#)

1. Introduction

The first and second iterations of this deliverable, D3.1 ‘Call Monitoring Report - 1’ and D3.2 ‘Call Monitoring Report - 2’ were submitted in March 2021 (M7) and October 2021 (M14) respectively.

For both the sake of coherence and ease of reference, the overall structure of these previous documents has been maintained. The deliverable therefore provides updated information on Open Call #1 and Open Call #2 and Open Call #3 in terms of projects closed and impact generated and on Open Call #4, evaluated, ranked and contracts issued and Open Call #5 with the evaluation process just about to close at the time of writing in Sections 2.1 through 2.5, and 4.1 through 4.5 respectively. Section 5 provides information on the monitoring and impact of the funded fellows which has also resulted in the publication of two Monitoring Reports in addition to the formal deliverables of the Project.

1.1 Scope and specific goals of the deliverable

The scope of the present document – which has public dissemination level – is to provide a detailed view of the outcome of the StandICT.eu Open Calls, in terms of received submissions, funded initiatives and the type of applicant, as well as other relevant information, such as outcomes of the calls in terms of the SDOs and standards dealt with by the funded proposals, and evidence of impact generated by projects closed under the first three Open Calls.

The main objectives of this deliverable are therefore:

- To provide information on the Open Calls released to date.
- To provide an overview on how the Open Calls were promoted (the overall promotional strategy is dealt with in greater detail in the dedicated deliverable D4.1 “Plan for the Communication & Stakeholder engagement strategy & Plan and promotion of the Open Call” (submitted in M3 – November 2020)
- To provide administrative information including the contractualisation of the applicants of the “*Fellowship Programme*” and the External Pool of Evaluators.
- To describe the online facility (Grants Platform), the overall infrastructure and the enhancements that have been carried out.

1.2 Structure of the document

The document is organised as follows:

- Section 2 provides a statistical overview of the applications received and funding granted through the 4 Open Calls closed and evaluated from November 2020 to November 2021, as well as those on applications received to Open Call 5 currently under evaluation. This also includes a snapshot of the opening and closing dates of the calls with the relevant funding allocated and assigned to date.
- Section 3 provides a detailed report on the composition and management of the External Pool of Evaluators (EPE) engaged under contract by StandICT.eu.
- Section 4 focuses on the applications received, providing details on the ranking and related applicants.
- Section 5 provides further information on the monitoring of the projects funded.
- Section 6 concludes the report, providing some lessons learned from the Open Calls.

1.3 Relationship to other deliverables and project outcomes

This deliverable updates the information provided in **D3.1 ‘CALL MONITORING REPORT - 1’ (M7)** and **D3.1 ‘CALL MONITORING REPORT - 2’ (M13)**. In addition, **D4.1 “PLAN FOR THE COMMUNICATION & STAKEHOLDER ENGAGEMENT STRATEGY & PLAN AND PROMOTION OF THE OPEN CALL” (M3)** sets out in detail the actual methodology and set of actions carried out for the promotion of the Call(s).

Finally, in addition to the formal project Deliverables foreseen in the Grant Agreement and routine monitoring of the grantee reports, StandICT.eu 2023 also published the second of a series of Impact Reports foreseen to highlight the important achievements and evidence-based results obtained by the ICT Standards experts funded under the second Open Call, “Following the Fellows - Impact Report from funded applicants to 2nd Open Call of StandICT.eu 2023 Fellowship Programme”, released in November 2021.

2. Summary outcome of Open Calls completed to-date and plan for future Open Calls

StandICT.eu 2023 is pleased to report on the excellent level of response and the remarkably high quality of the proposals received during the 4 Open Calls closed and evaluated to date and the activities already concluded or underway under Open Calls #1, #2, #3, #4, #5 and #6 (closing 14 February 2022).

The initial list of priority topics for the calls were taken from the Rolling Plan for ICT Standardisation. These were enriched over the course of the four calls with new inputs in domains such as **Edge Computing, Ontologies, Open Data Standards** coming from input from StandICT.eu 2023's partners, its External Advisory Group and members of the Technical Working Groups (TWG) in Blockchain, Cybersecurity, Artificial Intelligence, Big Data Spaces, Data Interoperability, Smart Cities and Trusted Information launched within the framework of its European Observatory – [EUOS](#). A complete list of the topics driving the applications at the time of writing is as follows:

- Accessibility of ICT products and services
- Advanced manufacturing
- Agri-food
- Artificial Intelligence
- Big Data
- Blockchain and Distributed Digital Ledger Technologies
- Building Trust
- Broadband infrastructure mapping
- B2B Platform economy (for digital manufacturing industry)
- Circular Economy
- Citizen centric digital public services
- Clean Planet
- Cloud computing
- Cloud Federation
- Cobots
- Construction - building information modelling
- Common Information Sharing Environment (CISE) for the EU maritime domain
- Cross Domain Technologies
- Cultural Heritage
- Cybersecurity / network and information security
- Data Governance
- Data Interoperability
- Digital Twins
- eCall
- Edge Computing
- Electronic identification and trust services including e-signatures
- eGovernment
- eHealth, healthy living and ageing
- e-Invoicing
- e-Infrastructures for research data and computing intensive science
- Electromobility
- EMC Radiation
- European Global Navigation Satellite System (EGNSS)
- Emergency communications

- e-Procurement – pre- and post-award
- European Electronic Toll Service (EETS)
- Fintech and Regtech Standardisation
- GDPR
- Global Standard Governance
- ICT Environmental impact
- Identity Management and Anonymisation
- Industry 4.0
- Intelligent Transport Systems - Cooperative, Connected and Automated Mobility (ITS-CCAM) and Internet of Things (IoT)
- Justice
- Language Technologies
- Learning and Education
- Machine Learning
- Management of identities for smart organizations
- Media
- Ontologies
- Open Data Standards
- Open Source
- Preservation of digital cinema
- Privacy
- Privacy protection
- Public sector information, open data and big data
- Quantum Technology
- Quantum Computing
- Quantum Key Distribution
- Robotics and autonomous systems
- Semantic Interoperability
- Single European Sky
- Smart grids and smart metering
- Smart City Covid+
- Smart cities and communities/ technologies and services for smart and efficient energy use
- Trusted Information
- Water Management Digitalisation
- 3D Printing
- 5G

Figure 1: Facts & Figures achievements over Open Call #1, #2 #3.

Figure 1 above provides an overview of the most relevant information on the 144 proposals funded under Open Calls # 1-4. This accounts for just over 1,200k euro in funding distributed directly to the ICT Standards experts and covering a broad range of key ICT technologies from the ICT Rolling Plan for Standardisation (25).

The wide spectrum of SDOs covered by the experts and the remarkable quality of the proposals which scored an average score of 8,60 or upwards (out of a maximum of 10) over Open Calls # 1-4 to meet the funding threshold.

While trending topics as Artificial Intelligence, Blockchain, Cybersecurity, ,5G and proved to be stable at the top of the most popular domains, applicants showed interested and addressed brand new technological areas such as Construction, Education in Standards, 3D Printing, Ontology Standards and Semantics, Quantum Technology.

The following provides a summary of the outcome of each Open Call, as well as some statistics on the typology of the applications and the successful applicants, with a clear breakdown of each area of interest. The statistics on Open Call #5 (under evaluation with results to be released at the beginning of February) pertain exclusively to the received and eligible applications.

2.2 Summary outcome of the 1st Open Call

Figure 2: StandICT.eu 2023 Open Call #1 Promotional Banner

The first StandICT.eu 2023 Open Call opened on 02/11/2020 and closed on 04/01/2021. Figure 3 below outlines the core dimensions of the outcome of the first call, including numbers of applicants, eligible proposals and funding granted. The first Open Call also marked the highest number of received applications so far (96 eligible proposals submitted).

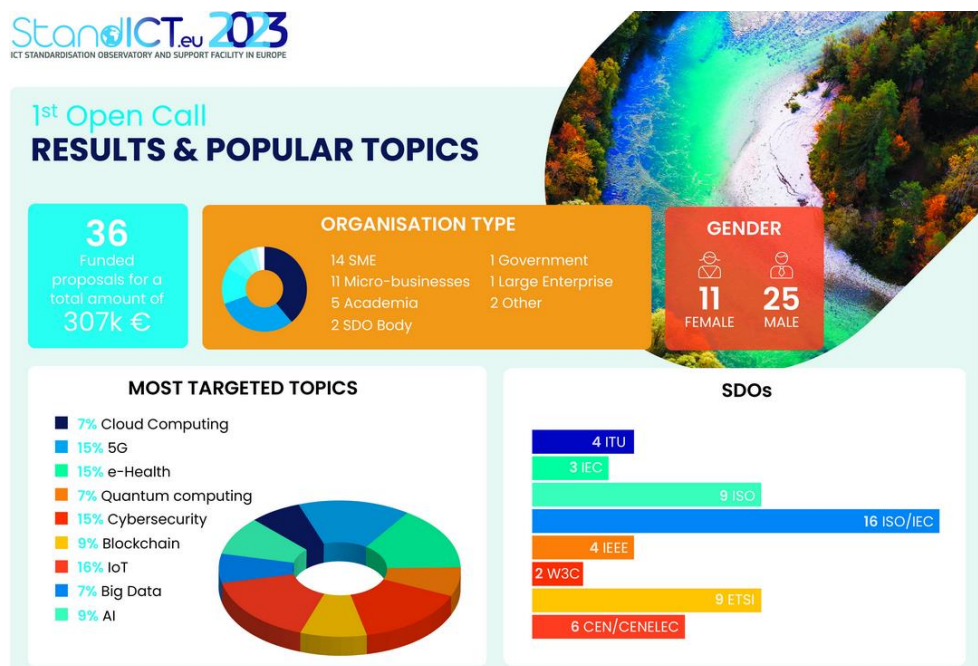

Figure 3: StandICT.eu 2023 OC #1 main facts and figures

2.3 Summary outcome of the 2nd Open Call

Figure 4: StandICT.eu 2023 Open Call #2 Promotional Banner

The second Open Call opened on 11/01/2021 and closed on 11/03/2021. Figure 5 below outlines the core dimensions of the outcome, including numbers of applicants, eligible proposals and funds allocated. Applicants working and/or collaborating with Small and Medium Enterprises are still the most numerous ones.

Figure 5: StandICT.eu 2023 OC #2 main facts and figures

2.4 Summary outcome of the 3rd Open Call

Figure 6: StandICT.eu 2023 Open Call #3 Promotional Banner

The third StandICT.eu 2023 Open Call opened on 18/03/2021 and closed 18/05/2021. Figure 7 below outlines the core dimensions of the outcome of the third call, including numbers of applicants, eligible proposals and funds allocated. Proposals aimed at new subjects have been funded, as Identity Management, Emergency Communications, Semantic Interoperability and Electronic Identification (eID).

Figure 7: StandICT.eu 2023 OC #3 main facts and figures

2.5 Summary outcome of the 4th Open Call

Figure 8: StandICT.eu 2023 Open Call #4 Promotional Banner

The fourth StandICT.eu 2023 Open Call opened on 15/07/2021 and closed 15/09/2021. Figure 9 below outlines the core dimensions of the outcome of the fourth call, including numbers of applicants, eligible proposals and funds allocated. Proposals aimed at new subjects included Construction – Building Information Modelling, Circular Economy and 3D Printing, with a growth also in applications to the 4th Open Call on Semantic Modelling and Ontologies.

Figure 9: StandICT.eu 2023 OC #4 main facts and figures

2.6 Summary outcome of the 5th Open Call (under evaluation)

Figure 10: StandICT.eu 2023 OC #5 Promotional Banner

The fifth StandICT.eu 2023 Open Call opened on the 27th of September 2021 and closed on the 29th of November 2021. Figure 11 below provides an initial snapshot of the applications, including numbers of applicants and eligible proposals, targeted proposals and SDOs, with additional information on topics previously listed under 'other' and those new to OC #5 such as Agri-food and Clean Planet. This covers only applications received in response to the call as the evaluation process is still underway at the time of writing with results to be released at the beginning of February

Figure 11: StandICT.eu 2023 OC #5 main facts and figures proposals received

2.7 Allocated Budget, Proposals Funded and Call timings

Table 1 below presents the financial status in terms of allocated budget from calls 1 to 4, the proposals retained for funding, and those actually funded, i.e., net of funds in those cases where fellows withdrew a winning proposal or failed to proceed to contract, which explains the slight differences between [A] and [B]. This will be closely monitored over the course of the coming calls so that any funding remaining with respect to the amount earmarked for each call is re-allocated under the subsequent calls to ensure that all of the funding available for the experts is utilised without compromising the very high quality of the proposals selected

Call No.	Opening Date	Closing Date	Grant Type	Allocated Funding [^] (A)	Actual Funding (B)	Cumulative Total
1	02/11/2020	04/01/2021	LT, ST, OS	€ 307.728,00	€ 305.228,00	€ 305.228
2	11/01/2021	11/03/2021	LT, ST, OS	€ 299.791,00	€ 275.131,00	€ 580.359
3	18/03/2021	18/05/2021	LT, ST, OS	€ 320.150,00	€ 310.150,00	€ 890.509
4	18/03/2021	18/05/2021	LT, ST, OS	€ 322.449,27	€ 322.449,27	€1.212.508
				€ 1250118	€ 1.212.958	

Table 1 – Call scheduling, allocated budget, allocated funding, actual funding, type

[^] Proposals retained eligible for funding prior to withdrawals or cancellations.

3. External Pool of Evaluators (EPE)

As reported in D3.1 and D3.2 and in accordance with the Grant Agreement, the evaluation of the applications received in response to the Open Calls is outsourced to a mix of ICT experts from each of the priority domains and vertical sectors, which come together in the StandICT.eu External Panel of Evaluators (EPE).

The EPE were also selected through an Open Call process via the Grants Management Platform. This call was launched on the 1st October 2021 and closed on the 30th November 2020.

Figure 12: The Open Call for External Evaluators

3.1 Composition of the EPE

One hundred and twenty-four applications were received in response to the Open Call. Encouragingly, a number applicants had already been engaged as evaluators for the pre-cursor StandICT.eu project. The applications were evaluated and pre-selected by one senior member per Consortium Partner on a unanimous basis. This list was subsequently ratified by the Project Management Board (PMB).

As a result, 73 applicants were accepted and 9 placed on a reserve list, overachieving the KPI of 50+ and providing good domain-topic and geographical coverage, as well as gender balance (based on the number of applications received). Sixty-three applicants were placed under contract with due provision for Conflict of Interest and Confidentiality ready for the evaluation of the Open Calls.

At the time of writing, the pool is formed of 53 members, following withdrawals, in almost all cases to apply to the Open Calls for funding.

A list of the current EPE is shown in table 2 below. Given the public dissemination level of this deliverable, this is limited to name, surname, organisation type, country, proposal ID, and contract no.

Finally, pursuant to art. 204 of the EC financial regulations (Title VII, "Experts") and Art. 287 of the Rules of Application, paragraph 5, the list of the EPE members under contract with StandICT.eu that received compensations in 2021 is provided in table 3 and published on the StandICT.eu website.

Of note is also the good mix of specialists from different organisation types such as SMEs, Research and Academia, IT Consultancy development and Government/Public Service. A number also have a dual role, as engaged experts, of SDOs and National Standards Bodies.

No.	Proposal ID	Contract No.	Name	Surname	Organisation Type	Country	Gender

Table 2 – External Pool of Evaluators

3.2 EPE Assignment and Assessment of the work carried out

Prior to assigning the EPE to the proposals received, the EPE were mapped in terms of their areas of competency to match them to the applications received in response to the open calls and maintain a good geographical and gender balance among the three EPE members allocated to each proposal.

To avoid situations where a skewed score given by one of the three evaluators assigned had a negative impact on the evaluation, or led to inhomogeneous comments to be provided as feedback to the applicants, from Open Call #2, one of the evaluators allocated to each application was also assigned the role of Rapporteur. This evaluator was tasked with editing and summarising the individual comments from each evaluator into one succinct piece of text to be provided in the comments box for the score given to each criterion and to propose a new score, where appropriate, via a dedicated discussion panel implemented for each application.

This became the basis for the Consensus Report (CR), to be shared as feedback to the applicants, as opposed to simply averaging the score and making the three separate sets of comments visible to the applicant via the platform, as originally foreseen under the Grant Agreement.

Further, a step of Quality Assurance was also introduced and performed by a fourth member of the pool. The Quality Controller was tasked with checking the text and coherence of the Consensus Report,

reworking the wording if necessary and to raise any evident inconsistencies still existing after Consensus and raise this with the Call Team.

An overview of the overall process is shown in the Fig. 11 below, while an exhaustive explanation of each step is provided to the evaluators via the Briefing Pack, annexed to D3.1.

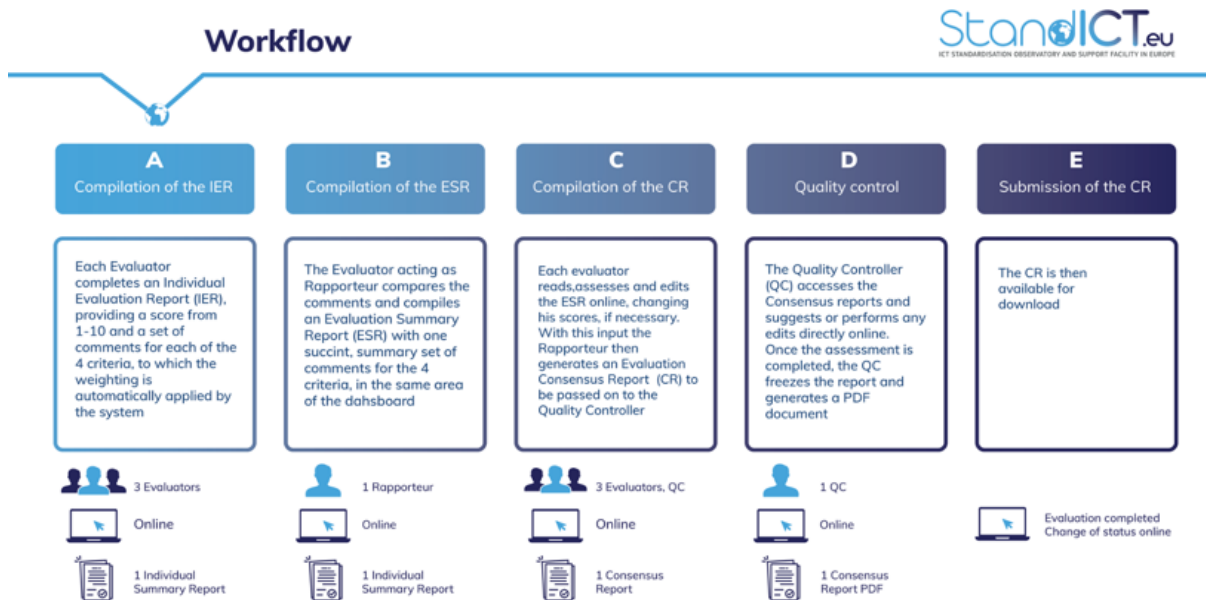

Figure 13: The Evaluation Workflow

The EPE were also trained on the process via a dedicated online webinar and a special reserved area was set up for the EPE on the StandICT.eu website, where they could access the training documentation, a recording of the webinar and of a demo of the online processes.

On the basis of experience rolled out during OC 1 and OC 2, and valuable input provided by the EPE, during OC 3 a further step was introduced whereby the QC was given the rights to refuse the CR in the system in the event of inconsistencies in comments and/or scores and return this to the Rapporteur for further re-editing/re-scoring. As part of this process, the Quality Controller also has visibility via their dashboard of the comments made in the discussion panel by the individual evaluators during consensus.

It is believed that this is a greatly improved process, which not only results in a more transparent and fair scoring system, but also serves to provide useful feedback to the unsuccessful applicants for re-submission of the proposals to subsequent calls.

3.3 EPE Payments

As per the construct of the contract, the EPE were paid on the basis of 400 Euro per day, or 50 Euro per hour. In addition to an initial once-off payment of 4 hours for set-up on the system, reading and assimilation of the briefing documents and participation in the training session, the EPE were paid 40 mins for each proposal evaluated, 60 mins for each Rapporteur role and 40 mins for Quality Control. A list of the payments made to the EPE over the course of the first four calls is provided in Table 3 below. Evaluation of Open Call #5 is still ongoing at the time of writing therefore yet to be paid.

Contract no.	Surname, Name	Country	Amount

TOTAL			70.800 €

Table 3 – External Pool of Evaluators

4. Applications received and funded

An overall total of 405 eligible applications were submitted for funding from Open Call #1 – Open Call #5. Overall, the standard of the proposals was extremely good resulting in a total of 141 proposals funded under Open Call #1 – Open Call #4 for a total of 1,212,958 Euro with an overall average score for funding under the 4 Open Calls over or above 7,62 to the budget depletion threshold of approximately 300,000 Euro per Open Call.

The contractual process with the grantees took approximately two-three weeks, depending on how quickly they reacted in verifying their personal information and returning the duly executed documentation to start activities. This set in motion the process to align the start and end dates for their work, where necessary, and kick off reporting and monitoring via their dashboard, as fully described in Section 5.

The contract in itself was straightforward and concise and with due attention to EU provisions such as Article 35 (conflict of interest), Article 36 (confidentiality), 38 (communication obligations) and right to audit. This also **included provision for entry into force upon signature with retroactive effect to the start date indicated for the activity at proposal submission** (implemented on the portal for submissions made from OC 3). This improved the turnaround time to gather the first results and impact of the open calls considerably and enabled the majority of the fellows to start their activities upon notification of funding.

Of note, a slightly modified construct of the contract following that of the above was implemented for those cases whereby a specialist was not able, for employment or other reasons, to receive the fellowship directly. This followed the same structure as that mentioned above, with a clear undertaking from the university or organisation to devolve the fellowship in its entirety to the individual without any overheads or administrative charges.

A full list of the applications received in response to OC #1 to OC #4, with proposal ID, Score, Funding allocated and Contract No. is provided in 4.1-4.4 below with details of the 86 eligible applications received in response to Open Call #5, yet to complete the evaluation and assignment process in 4.5.

As mentioned above, details on the monitoring of each contracted fellow and the status of the projects is also provided in Section 5.

4.1 Applications submitted and funded under Open Call #1

A full list of the eligible applications received to Open Call #1, including those not retained for funding, is provided in Table 4 below, in order of ranking with the proposal ID and the contract number, the funding granted [B] against requested [A] and the amount paid at the date of writing [C]. The grey-shaded applications are those that were withdrawn, or for which the contract was cancelled subsequent to issue.

A full list of the eligible applications received to Open Call #4, including those not retained for funding, is provided in Table 7 below, in order of ranking with the proposal ID and the contract number, the funding granted [B] against requested [A] and the amount paid at the date of writing [C]. The grey-shaded applications are those that were withdrawn, or for which the contract was cancelled subsequent to issue.

Rank	Score	ID	Contract	Status	Organisation Type	Country	Proposal Title	Grant Type	Requested [A]	Granted [B]	Paid [C]

Table 8 – Proposals submitted and funded under Call #3

5. Monitoring of the Funded Fellows and Impact

5.1 Monitoring Methodology

The StandICT.eu 2023 Fellowship Programme monitoring is supported by the Logical Framework Approach (LFA) allowing to analyse and organize the gathered monitoring information in a structured way. Within this framework, the following project aspects are controlled:

- Identification of successes and problems during the fellowship implementation.
- Informed and timely decision making by project manager to support the implementation.
- Accountability for the activity and results achieved.
- Fellows' contribution to the dissemination of the results and participation in the StandICT.eu 2023 Programme.
- Assessment and validation of the fellowship's achievements and activities.

The TRUST-GRANTS™ platform enables to implement the LFA in practice and to track down all the required fellowship data. Moreover, to gather the fellowship performance data, the funded fellows are requested to provide a set of monitoring elements:

For the One-Shot and Short-term fellowships (up to 3 months) three monitoring elements are requested: the fellowship work plan (defined in the application), the project summary (provided during the contracting phase) and the final report (submitted for the project end date).

For the Long-Term fellowships (up to 6 months) four monitoring elements are requested: the fellowship work plan (defined in the application), the project summary (provided during the contracting phase), the interim report (submitted in the mid-term of the project) and the final report (submitted for the project end date).

5.2 Monitoring Tools

The TRUST-GRANTS™ platform enables monitoring of the fellowships progress in real time based on the start and end dates of each individual funded fellowship, as well as on the work plan provided as a part of the fellowship application. The project team consults the platform daily to identify new achieved fellowship milestones (namely, interim, and final report submissions) and possible deviations. Only the designated StandICT.eu team members are granted rights to access the project monitoring tool on the platform.

ID	Title	Username	Name	Surname	Report Status	Report details
03-320	Standard invoicing implementations in Ireland	edmundg	Edmund	Gray	✓ On Track	Report Details

Figure 14: StandICT.eu 2023 Reporting Follow-Up on Trust-Grants

The fellows perform their reporting via Trust-Grants respecting the set deadlines (at the mid-term and/or at the end of their fellowship).

The Interim report, that LT fellows submit at their project M3, enable to follow the mid-term progress of the fellowships monitoring namely: the concerned standardisation challenges and gaps, the addressed SDOs, WGs and TCs, the number of participated meetings, webinars, workshops as well as the overall progress compared to the initial work plan.

The Final report, submitted at the end of the fellowships (at M3 or M6 based on the fellowship type), contain questions regarding the achieved standardisation activities but also on the project's impact on SMEs, on the society as well as the possible contributions to the EUOS Work Groups.

The StandICT.eu 2023 project managers review the content and the quality of all submitted reports, and if the set quality criteria are met, the reports are validated enabling the project to move towards the next milestone. These criteria concern to assess the consistency of responses in the open question, if all questions are addressed, and if the data provided enables to understand the main achievements and to draft the performance story.

Upon the validation of the submitted final report, Trust-IT administrative team is notified, and they launch the grant payment process. In case that the submitted reports do not meet the set quality criteria, the re-submission of the report is requested with information on the improvements to be done for the validation of the fellowship.

5.3 Communication as part of Monitoring Process

To raise awareness about the monitoring process and the impact assessment, StandICT.eu 2023 team run a twofold communication process, *internal and external*.

To keep the monitoring process running smoothly, AUS is in daily contact via emails with the funded fellows making sure that the fellows are aware of the available reporting tools and the set deadlines. In case of delays or other foreseen complications during the fellowship, AUS connects the fellow with TRUST-IT team to mitigate all risks impacting the project as quickly as possible.

The external communication related to the monitoring focuses on the impact assessment and dissemination towards the StandICT.eu 2023 community. It includes a series of fellowship impact reports as well as regular communication on StandICT.eu social media channels, in Twitter² and in LinkedIn³, as well as Impact success stories. More information is available in *D3.4 Interim impact report*.

² https://twitter.com/Stand_ICT

³ <https://www.linkedin.com/company/standict-eu>

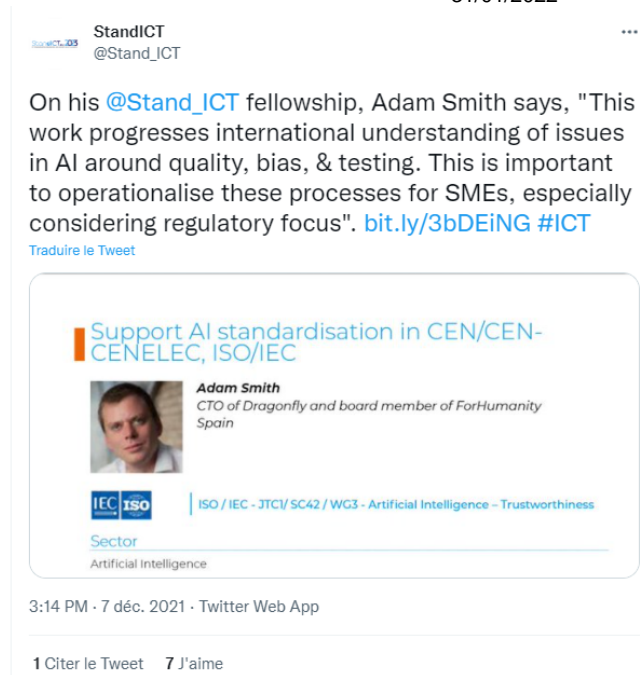

Figure 15 Example of Social Media Post on a Fellowship Performance Story

Moreover, a series of **dedicated impact reports, in addition to the formal deliverables of the project are being published, each showcasing the activities, impact and results deriving from the funding provided under each open call.** The aim of these impact reports is to share insights from the key standardisation activities performed, as well as giving visibility of the results and the StandICT.eu 2023 community within the ICT standardisation community. The First Impact Report covering OC1 was published in August 2021⁴, while the second, covering OC2, was published on December 2021⁵

5.4 Current Monitoring Status of the Fellowship Programme

From the beginning of March 2021 (M7) onward, 141 funded fellowships are currently monitored. AUS monitors the overall status and progress of the fellowship programme under the different fellowship batches:

Batch 1 (funded under OC#1) covered 35 fellowships; the monitoring started in March 2021. This batch, comprising 2 Short-term (ST) fellowships and 33 long-term (LT) fellowships, is now closed, with all final report submitted.

Batch 2 (funded under OC#2) funds and follows 36 fellowships, the monitoring started in July 2021. This batch includes 6 ST fellowships and 30 LT fellowships, and the monitoring progress is almost finished, with just 1 interim report and 4 final reports missing, as shown in Figure 17.

Figure 17 Batch 2 - Fellowship Monitoring Status

Batch 3 (funded under OC#3) comprises 35 fellowships including 1 ST fellowships and 34 LT fellowships. This monitoring started in September 2021. The collection of interim report is almost completed (31 out of 35 interim reports submitted), while 63% of the final reports (22/35) have been submitted).

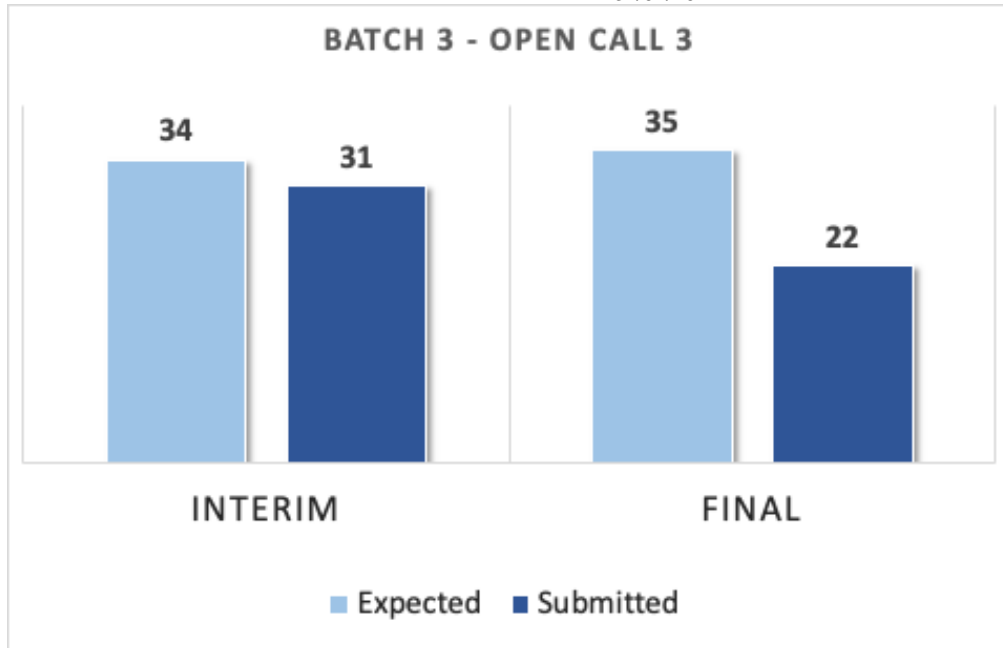

Figure 18 Batch 3 - Fellowship Monitoring Status

Batch 4 (funded under OC#4) comprises 38 fellowships including 4 ST fellowships and 34 LT fellowships. The monitoring of these fellowships kicked off in December 2021, therefore, given that was just one month from submission of this deliverable, the reporting is mostly interim (12 reports) with 2 final reports submitted at the time of writing, as shown in Figure 19.

Figure 19 Batch 4 - Fellowship Monitoring Status

6. Lessons learned and next steps

The positive trend of high-quality proposals received extended to the 5th Open Call with the majority of the submitted applications scoring well beyond the minimum acceptance threshold (score of 6 out of 10). This points out once more the overall high competence and solid know-how of the StandICT.eu 2023's applicants.

Some new trends, communications action points and takeaways that emerged in the course of the latest Open Calls are listed below:

- New ICT domains included in the current Rolling Plan for ICT Standardisation were added to the latest Open Calls and specifically: Agri-food, Clean Planet, Smart Grids & Smart Metering, Cross Domain Technologies and Construction.
- As part of the Impact Assessment procedure and overall dissemination strategy, the Consortium managed to release two “*Impact Report*” publications, as part of its Following the Fellows series, further described in Section 5 to collect and showcase the most tangible achievements of the applicants funded under the first two Open Calls. Each Open Call will have a dedicated report with the goal to share the timely key findings, contributions, and observations with StandICT.eu community, the European Commission, the Multi-Stakeholder Platform, the SDOS.
- StandICT.eu 2023 started to track, collect and showcase all of the funded activities with the aim of the creation (or revision) of new Standards, Working Groups, Technical Committees or Focus Groups.
At the time of writing, 68 applicants stated to have contributed to the development/draft of new Standards and 47 are currently working (or contributed) to setting-up new TCs, WGs, sub-committees or Focus Groups within international SDOs.
- The Consortium put in place a new strategy to improve the gender balance and increase the engagement and participation of women ICT specialists to the Open Calls (currently 20% vs 80% of male counterparts). The first tangible step is the launch of a dedicated “*Women in ICT Standards*”⁶ Webinar series with the objective of bringing women closer to the StandICT.eu Fellowship Programme, while raising awareness on how the role of women in ICT has gained relevance over the past. The first edition of this event took place on the 25th of January 2022.
- The Consortium branched out the network of relevant synergies (mostly with European ICT key-players) by reaching out additional initiatives and entities operating in different technological areas and to onboard new perspectives and skillsets in the frame of the project. To date, 14 Memorandum of Understandings have been signed (with more under discussion), on top of many other types of collaborations with different entities (European Standards Organisations, SDOs, PPPs, various H2020 ICT projects, large enterprise and more). At the time of writing, the Consortium is carrying out an outreach campaign to establish a connection with 45 EC funded projects who deal with Standardisation (with dedicated tasks or as part of a Work Package). The list was obtained as input from the participation at the European Commission Stakeholder Workshop of the 3rd December 2021 – “*Scoping study for supporting the development of a Code of Practice for researchers on standardisation*”
- Newsletters have also been leveraged as prominent tool to display and disseminate the key-figures of each Open Call to the whole StandICT.eu 2023's community.
- A 1-on-1 LinkedIn message campaign was run during the 2 weeks preceding the actual deadline of each Open Call to keep the community of followers abreast of the pending deadline

⁶ <https://www.standict.eu/events/7th-walk-talk-webinar-women-ict-standards>

and invite them to submit a proposal.
